English General

In today's world, the word "globalisation" is a cliché already. English is not just a foreign language anymore. It has become a part of our everyday communications to a level we just can't ignore.

Explore the English language in a wide variety of contexts and real life situations. Familiarise yourself with all the standard accents and right grammar. Sharpen your knowledge of English language and prepare yourself to face any academic or professional or social scenario.

Public Express

You don't need to be a politician or on the stage of Oscars to be a good orator.

Public speaking is a skill we all need to influence and communicate with the mass, small or big. Be a family get together or the conference room at work, you are what you speak. Aboard the Public Express, we help you to express yourself bold and confident, making your stand highlighted.

Write Away

If you want to get better at something, you have to practice – and writing is no exception. But practicing the "right way" is all that matters.

Learn the basic principles of professional writing, usage of correct grammar, spellings and the punctuation rules. Add that confidence to whatever you write and make it effective. From basic email etiquettes to precise technical write-ups or a stunning blog, we offer a platter of writing programs for you to choose from.

COURSES, WORKSHOPS & TRAININGS

Leading a corporate lifestyle is not just about the way you dress yourself up, but how you live it up to your success.

ELTAcorp delves deep into your elevation as an individual, guiding your way through the apparent “grind” that gears the corporate world. Communication, negotiation, leadership and all the other skills are finely crafted in your arsenal, preparing you for the corporate battlefield.

Across the table

The art of communication shoots to a new level when you practice it across the table. Be a board room discussion or that scheduled final interview, you will definitely stand a better chance if you know the skills to tackle through.

ELTA has devised a neat, practical, mock-sessions based program to groom people across all levels to make them feel confident in handling any situation where they need to initiate, maneuver or lead a discussion or a formal communication in English.

At any given time, 5% of the world’s population aged between 5 and 50 suffer from the fear of speaking in open to others. The fear mounts up even more when you are not confident about the language, its accent and the right pronunciation.

At ELTA, we have voice and accent programs for both British and American English. It’s not just for the BPO industry, but in this ever evolving global market, we suggest voice and accent programs for every individual from all walks of life: a housewife to a school teacher, an actor/performer to a CEO.

Teacher Trainings

“One size doesn't fit all. We all know that. Evidently, there has been a growing awareness of the necessity to bring about a change in the traditional teaching approach, to shift from the lecture mode, where the control is in the hands of the teacher, to a much more learner centred approach ...” believes Debarati Roy, founder, ELTA.

ELTA's teacher training program emphasises on Flipped Learning, where a learner is the focal point. Aided with **Neuro Linguistic Programming (NLP)**, Understanding individual learning styles not only helps educators to deliver more effectively, but also enables a learner on a richer, holistic understanding.
